WARNING: THE APPLICATION OF FERTILIZING MATERIALS CONTAINING MOLYBDENUM (Mo) MAY RESULT IN FORAGE CROPS CONTAINING LEVELS OF MOLYBDENUM (Mo) THAT ARE TOXIC TO GRAZING ANIMALS.

WARNING: THIS FERTILIZER CONTAINS BORON (B). THE USE OF THIS FERTILIZING MATERIAL ON ANY CROPS OTHER THAN THOSE RECOMMENDED MAY RESULT IN SERIOUS INJURY TO THE CROP(S).

DIRECTIONS FOR USE

ProAcqua™ brand products can be used on all crops grown under field or controlled environments. They are designed to be part of a balanced fertility program. Recommended rates should take into account 1) soil properties (nutrient rates, pH, organic matter, cation exchange capacity); 2) irrigation water properties (alkalinity, soluble salts, pH); 3) weather conditions; 4) tank mix; 5) general crop health; and 6) crop stage. Application of our products at the right time and right place will ensure maximum efficiency.

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

When making foliar applications do not mix with strong basic materials (lime, lime sulfur, KOH) or spray oils. Can be mixed with a wide range of crop protectants. Consult the crop protectant label for any information on possible antagonism with certain fertilizer blends.
